LEAN

Manufacturing

Our company has implemented the Lean Manufacturing methodology, focused on optimizing production processes by eliminating waste, improving efficiency, and reducing environmental impact. This approach ensures that productivity is maximized by using resources efficiently and responsibly, aligning with our commitment to sustainability.

TOGAMA
MORE THAN MOSAIC

100% RECYCLED GLASS

We use 100% recycled glass as the main raw material in the production of our products. This decision not only avoids the use of natural resources but also significantly reduces environmental impact by minimizing waste and promoting a circular economy.

TOGAMA
MORE THAN MOSAIC

REDUCTION of Hazardous Products

We have implemented a rigorous policy to reduce the use of hazardous products in our manufacturing process. This measure ensures a safer work environment and reduces the generation of hazardous waste, contributing to the protection of the environment and the health of our employees.

CARBON FOOTPRINT Improvement

1.- Eco design:

We incorporate eco-design principles into every phase of our product development, reducing and controlling emissions throughout the product's life cycle, from conception to end of life.

2.- 100% Renewable Energy:

Our entire production process uses electricity from 100% renewable sources, which significantly contributes to the reduction of greenhouse gas emissions.

3.- Use of recycled materials:

Instead of extracting and transforming new natural resources, we work exclusively with recycled glass, reducing energy consumption and CO2 emissions.

Certification

ISO 14001

We hold the certification that supports our commitment to environmental management. All our designs are framed by a life-cycle perspective, evaluating and minimizing environmental impact from raw materials to the end of the product's life.

ISO 9001 | 14001
Registered Company n° 30350001 UM15

Commitment to the **2030** SDGs

We align with the 2030 Sustainable Development Goals, promoting responsible practices in all our operations to contribute to a more sustainable future. This commitment is reflected in our daily actions and long-term strategy.
